Dear Travel Industry Colleague,

**Re: Travel Japan SIM Card**

I've been seeking an opportunity to expand the demand of 'Travel Japan SIM Card' for business and leisure travelers to Japan. Considering benefits for users, I think it's too good to apply to the limited market.

The 'Travel Japan SIM Card' as with other SIM cards sold in overseas allows travelers to Japan to use Wi-Fi during their stay in Japan. What is the difference? The 'Travel Japan SIM Card' allows travelers to Japan to enjoy Wi-Fi much more comfortably.

As you know SIM cards are compatible for SIM free phones and SIM lock-free phones. Four plans are available at the moment, ie. 6 days, 8 days, 16 days and 31 days.

I'm confident that the following prices are very much competitive in Singapore and Malaysia. You're allowed to decide the selling price freely in your market. You'll be surprised to know the fact that the SIM cards are sold at around @JPY5,000+ at Narita and Haneda airports.

The minimum order quantity is 20 cards, which is on a purchased basis without returns.

Plan		Quantity	Net Price* per piece
<b>Price List</b>	1	6 days	From 20 to 249 @JPY1,650
			From 250 @JPY1,550
	2	8 days	From 20 to 249 @JPY1,950
			From 250 @JPY1,850
	3	16 days	From 20 to 249 @JPY2,500
			From 250 @JPY2,400
	4	31 days	From 20 to 249 @JPY3,000
			From 250 @JPY2,900

\*Tax is NOT included.

'Travel Japan SIM Card' features:

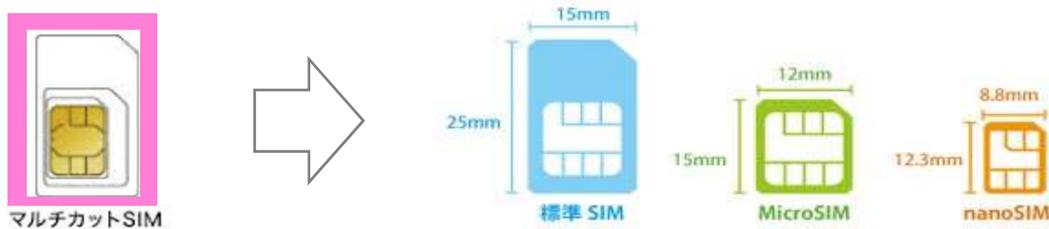

- **NTT network** throughout Japan
- **UNLIMITED data traffic**
- Theoretical data signaling rate: **Downstream Max. 788Mbps, Upstream Max. 50Mbps**
- Communication standard: **4G/LTE**

Travel Kids Co., Ltd.

Enjoy real 4G LTE speed from the Japan's largest network. Please take a note that NTT docomo has achieved 99% population coverage.

Other features of 'Travel Japan SIM Card' are:

- The SIM card is compatible for **3 sizes** (ie. Standard, Micro and Nano).
- Validity of the unused SIM card is **N (ordering month) + 11 months**. Therefore, you can easily control the stock and you won't lose the opportunity.
- **No activation**. You don't have to call to activate your SIM card. Just insert the SIM and set APN.
- **No personal data required**.
- No frustration! The operation by the designated band confirms **stable traffic speed**.
- No worries! **24 hours, 365 days multi-lingual support is available** over the phone.

Comparing various SIM cards available overseas, most of them have set a LIMIT. The 'Travel Japan SIM Card', featuring NTT network, 4G/LTE, Unlimited data traffic and Competitive price, is really **VALUE FOR MONEY**.

Recently there has been sold-out days at Narita and Haneda airports. The demand for the SIM card is expected to become bigger. Some people say the counter product must be Wi-Fi routers. However, for individuals it's not smart to share the same time and the same place with other people.

Again, this product will be a must-have item for travelers to Japan and I hope it will bring us a chance to establish a mutually beneficial business relationship.

I look forward to hearing from you soon.

Kind regards,

Hiroaki FUNADA
